

A future dark

I despise what I am  
Can't deny to be a human  
Destined to scorch the earth  
Until there is no more left

Nothing will ever change and history repeats itself  
Don't dare to see the world through my eyes  
Sick human nature and twisted insane minds  
Call me misanthropy I call you lie

We see a future  
Cold and dark

I despise the shit you breed  
Hatecrowned in hypocrisy

Nothing will ever change and history repeats itself  
Don't dare to see the world through my eyes  
Sick human nature and twisted insane minds  
Call me misanthropy I call you lie

We see a future  
Cold and dark

A future dark

Intolerance for the intolerant  
Nothing will remain

A future dark  
A future dark

Cut my knife through flesh  
The language you understand

masquerades of hate  
peaceful delusion  
legacy of blood  
peaceful delusion
